

Lesson **Photosynthesis Got Powerful** for 7-8th

Design Facebook page of Superplants

Imagine a world where plants grow 50% faster and need less water. These “superplants” are changing farming, society, the environment, and the economy. Imagine they have a Facebook page where they post their adventures.

Step 1: Create Your Characters

- Superplants (give them names and personalities)
- Farmers, kids, scientists, business men or city people

Step 2: Narrate the Adventures of Superplants

- How do they help farmers?
- How do they help the environment (rivers, soil, air)?
- How do they help the city people (society, schools, jobs, and business)

Design the Facebook page of superplants with fun captions and drawings to show a day in the life of a superplant in this world

Upload: PDF, image, screenshot of actual FB page or hand-drawn photos of FB page

Think like a storyteller and a scientist at the same time!
